**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-19 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. Regarding claim 1, prior art of record does not teach the voltage amplifier comprises first and second transistors in series, the input to the voltage amplifier being provided to the gate of the first transistor, and the output being defined by the junction between the first and second transistors, and wherein each pixel further comprises a third transistor, the gate of the third transistor being connected to one terminal of the light sensor element, and the source of the third transistor being connected to the gate of the first transistor.
4. Regarding claim 14, prior art of record does not teach a method of measuring light intensity of an image to be detected using a plurality of light sensor elements each forming a pixel of an image sensor, a sensor voltage across the elements varying depending on the light incident on the elements, the method comprising: providing the sensor voltage to an in-pixel voltage amplifier through a source-follower buffer transistor; amplifying the voltage provided by the source-follower buffer transistor using the in-pixel voltage amplifier having a gain magnitude greater than 1 ; charging a sampling capacitor with the amplified voltage and measuring the flow of charge required to charge the sampling capacitor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
